

A Partial Critical Edition of Pātañjalayogaśāstravivarāṇa 1.7

Kengo Harimoto

August 26, 2026

1 Pātañjalayogaśāstravivarāṇa 1.6–7

1.1 Sūtras 1.6 and 7 plus the Bhāṣya up to the definition of *pratyakṣa*

kāḥ punas tāḥ kliṣṭākliṣṭāḥ pañcaprakārā vṛttaya ity āha—

pramāṇaviparyyayavikalpanidrāsmṛtaya iti||6||

etāvatya eva vṛttayaḥ| tatra—

pratyakṣānumānāgamāḥ pramāṇāni||7||

pramāṇākhyā (vṛttis tridhaiva bhidyate| tatra pramā)ṇākhyāyās cīttavṛtteḥ
prathamō bhedaḥ pratyakṣam| atas tallakṣaṇam evābhidhīyate tatpūrvvaka-
tvād bhedadvayasya||

5 etāvatya eva] TE, etāvatya eva L

6 °gamāḥ] T^pLE, °gamā'h' T

7 pramāṇākhyā] em., pramākhyā TLE

7 cīttavṛtteḥ] TL^pE, cīttavṛtte'h' L

3 kāḥ punas tāḥ kliṣṭākliṣṭāḥ pañcaprakārā vṛttayaḥ 4 pramāṇaviparyyaya-
vikalpanidrāsmṛtayaḥ||6|| 6 pratyakṣānumānāgamāḥ pramāṇāni||7||

3 don't forget the reference in BSBh 2.4.12: nanv atrāpi śrotrādinirapekṣā bhūtabhaviṣyadā-
diviṣayā aparā manaso vṛttir astīti samānaḥ pañcasaṃkhyātirekaḥ; evaṃ tarhi 'paramatam
apraṭiśiddham anumataṃ bhavati' iti nyāyāt ihāpi yogaśāstraprasiddhā manasaḥ pañca vṛt-
tayaḥ pariḡrhyante – 'pramāṇaviparyyayavikalpanidrāsmṛtayaḥ' nāma;

5 should this tatra be part of the sūtra or the bhāṣya?

9 That all the other pramāṇas presuppose pratyakṣa is not particularly special but it is
interesting nonetheless that our author makes an explicit statement.

2 Perhaps tatkriyārtham tat is a good reading. Cittavṛttya^{hetuka} should refer to śrotrāḍi (they do not act because of cittavṛtti); "they (śrotrāḍi) exist for the sake of that (cittavṛtti)" remove "ka"! remove the first tat!

3 tu and u are hardly distinguishable. This reading might be justified. However, it would be a little peculiar syntax...

4 The verb upavyākhyā appears in the ChU. Due probably to this, Śāṅkara uses this verb in a technical sense, it seems.

4 again, here appears to be a support that śrotrāḍi are there for the sake of cittavṛtti

14 The choice of the verb avabhās and "ka"?

16 Something is lost, around here, I think. Something like "(viśeṣāvdhāraṇapradhānety) yuktam| tadā kiṃ sāmānyam nāvdhāryata ity (āha)" Or simply replace āha with uktam? without the question mark; just divide by a comma? āha part of the previous sentence?

20 "kiñ ca" and "...tvāc ca" are redundant.

2 Sāmānya being the origin of saṃśaya and viparyaya could be a unique point of view. At least our author is following something. I should figure this out.

8 Certainly a Buddhist but who? Dignāga?

8 The matter is a bit more complicated. See the Tarkabhāṣā of Mokṣākaragupta toward the end of pratyakṣa and Kajiyama's notes 131ff (section 7.1; pp. 56ff.). According to Kajiyama, Dharmottara and Ratnakīrti contributed to Mokṣākara's saying indriya also takes sāmānya as object but I don't see those two clearly saying it in the passages cited by Kajiyama. The criticism that Buddhist won't acquire sāmānya to form inferences is already in Kumārila.

9 The meaning is clear but the use of the compound anupalabdhapūrvamukhya and its association of smṛti might be of interest

10 Is he talking about some sort of saltlake like places? The example used by the Buddhist means something like positing (salty) water in salt rock desert?

11 This, too, must have some background...

12 Again the meaning is more or less clear but apparently this is a very abridged form of a more lengthy discussion.

15 OK, here is more detail. Not necessarily an abridged discussion. Do we see something like this elsewhere?

16 There are only deśakālānyathā or deśakālānyatva in use it should be deśakālādi. See the next sentence. deśakālādyaviśiṣṭa...!

pratyakṣata upalabhyamāṇe nānumānam, nāgama iti/

11 This part should mean “na pramāṇāntaram”. Does this mean what may be called yo-
gipratyakṣa or sukhaduḥkha, etc., are not pramāṇa because they do not [generate] a notion
in people? And by puruṣapratyaya, does he mean something like hānopādāna? A tentative
translation of this sentence would be “No. For, since pramāṇa is expected to [produce] notions
[of hāna and upādāna] in man, [they—yogins’ darśana and sensations such as sukha-duḥkha]
do not qualify [as pramāṇa].” Pratyaya in Śāṅkara is always in the form of a sentence? Not
really. Even in the Vivaraṇa itself, there are usages like ahampratyaya or ihapratyaya.

11 20161014: The above was probably wrong. The answer “na” is probably OK. This should
mean that there is no need to tell that those two are part of pratyakṣa or there is no need to
postulate (an)other pramāṇa(s) to incorporate those. “pariḥṛtatvāt” means that those two
possibilities are precluded because of the definition(?) that follows

11 Also, this part appears to tell a rather unique view on pratyakṣa. Do the followings
help? BSBh 1.3.33 pratyayāpratyayau hi sadbhāvāsadbhāvayoḥ kāraṇam; nānyārthatvam
ananyārthatvam vā; BSBh 2.2.25, 29?

11 Does he mean anumāna, śabda/āptavacana, etc., to be apratyaya?

11 This sentence basically says the same thing as the previous one.

1 We could emend this to sukharāgādivijñānasya but may not be necessary. The two expressions mean the same thing.

1 kliṣṭākliṣṭa is an expression to qualify all the vṛttis. See YBh 1.3(?).

2 Is the argument as follows?: The Bhāṣya says the result of pratyakṣa is tadaviśiṣṭaḥ pauṣeyaś cittavṛttibodhaḥ; any cittavṛtti that produces that sort of result qualify as pratyakṣa; the cognition of sukha, rāga, etc., produce such results; therefore they are pratyakṣa? They are not another kind of pramāṇa because...they can be categorized in pratyakṣa?

4 So, the first category in question, yogipratyakṣa, indeed is pratyakṣa.

8 The use of iti at the end of this paragraph appears interesting.

10 again iti at the end

1.4 *Pramāṇaphala*

4 I wonder if the author of the Bhāṣya in fact had Dignāga in mind. The order of the whole commentary (Vivaraṇa) on pratyakṣa reflects that of the Pramāṇasamuccaya. I wonder if this indeed reflects the thought of the Bhāṣyakāra. This seems unlikely. It was the Vivaraṇakāra's idea that somehow the definition in the Bhāṣya should cover yogipratyakṣa and mānasapratyakṣa. The Bhāṣyakāra apparently had no idea his definition would become problematic.

4 Is he basically following the Pramāṇasamuccaya? PS 1.8

5 The above sentence looks really weird. I should be looking at the Tantravārttika, Prakaraṇapañcikā, NVTT, NBh, NMañ for hānopādānopekṣā. For pramāṇavyakti, see the TSP, NVTTP.

5 Our author does not like either view.

6 This is a quote from the Nyāyabhāṣya! No emendation???

7 He is in fact following this Naiyāyika idea of hānopādānādibuddhis being the phala of pramāṇa? Most likely not. At the end, he says "nāpi tadvyatiriktapramāṇāntare."

9 This should refer to another reason that is going to be stated why pramāṇa and pramāṇaphala are not two different things. Therefore, tataś ca (for the same reason) does not seem right. L9r6 after vi below

9 Could anyaprameyasya an interpolation from a marginal comment?

10 The whole of the above is hopelessly corrupt... but at least vyaktyantare phalam or pramāṇavyaktyantare phalam appears consistent. So, that reading might be OK.

10 The space left in Tm is curious. There could have been something written and erased although doing so without visible traces in a Malayalam manuscript should not be easy because writing literally leaves the surface scratched. A possible candidate that could come there is something like upekṣaṇa.

1 I cannot read what the letter before bha is in Tm; Td ignores it.

1 This sentence should explain why tyāga and upādāna are not the result of cutting of khadira tree but the result of ...yogasambandha. This might be simply viyogasambandhaphalatvāt, meaning that a relationship that is detached from khadiracchedana. The decision of whether taking or abandoning the resulting khadira wood comes not from the cutting but from somewhere else.

2 NS/NBh/NV etc., BAUBh, ĀŚV, Bhāmatī, Upad etc. dvaidhībhāva means "making something into two." Something appears to have gone horribly wrong with these paragraphs. Cutting khadira is a Śābarabhāṣya thing. So, the translation might be something like "[Abandoning or taking of the khadira wood] is detached from the result that is making [the tree] into two."

4 phalād api part should mean something like "simply from the [first] result."

5 No need for conjecture???

8 Here it is again. The action being pain.

14 So far, it appears that our author is saying that in pratyakṣa (or in pramāṇa in general?), bodha and pramāṇa (a vṛtti) share the same ākāra, and the bodha and puruṣa share the same ākāra.

tavyamityalaṃ pravistareṇa / Or in BSBh, look for avasthāntara. It is the cause of bhedāb-
hedābhāva Grammarians? About odana and phala

7 So, basically the three things are not the phala: kriyā pramāṇa dravya. The last part I
cannot say I fully understand but one can figuratively say either dravya or kriyā is the phala?
I still don't understand in what context our author is talking about the phala. Regular
kriyā or specifically pramāṇa? Is there the picture of pramāṇa to kriyā to the change in
dravya? Looks like pradhānakriyā is pramāṇa and pradhānakriyāvyavahitaviprakṛṣṭakriyā is
the secondary;

9 buddheḥ? The bhāṣya actually reads "pauruṣeyo bodhaḥ." So, it should be masculine. Or
he means vṛtyaviśiṣṭāyā avasthāyāḥ? <- That should be it!

16–17 pratisaṃvedī buddheḥ puruṣa ity upariṣṭāt pravedayiṣyāmaḥ

3 This notion that *pramāṇa* is anyway wrong is present in the intro to the BSBh.

3 vṛtyākāra was *puruṣa*. This sentence does not make much sense.

3 A tentative translation: For [*puruṣa*] who takes the shape of the [*citta*]vṛtti, the main result [then] is nothing but unreal. That way, seeking [the main result of *pratyakṣa*/*pramāṇa*] will be impossible. doesn't tad refer to *puruṣa*?

5 YS 3.35

6 What he is doing in these paragraphs is that *pramāṇa* is essentially *mithyā* for mixing up *puruṣa* with *cittavṛttis*. *Pratyakṣa*/*pramāṇa* does not lead to *mokṣa*. It rather leads to *saṃsāra*.

8 If we adopt the reading na, *samyagdarśana* means *pramāṇa*, not *vivekakhyāti*. But the following suggest ca is better.

12 This is such a typical Śāṅkara thing to say!

17 This ends the discussion on *pramāṇaphala*. He does not believe in *pramāṇa* or *pratyakṣa* to lead to *mokṣa*.

17 The part being referred to in the Bhāṣya is probably not YBh 2.17 but YS 2.20. The *Vivaraṇākāra* refers to this very passage of YBh 1.7 when commenting on the sūtra (2.20) as the one being referred to be established in the future. YBh 2.20 also has "sa *puruṣo* buddheḥ pratisaṃvedī." In that sense, whether the reading was *pravedayiṣyāmaḥ* or *upapādayiṣyāmaḥ* may be determined by looking at MSS for the part where they record the *Vivaraṇa* on 2.20. The edition reads *upapādayiṣyāmaḥ* in YVi 2.20 (p. 189)... So, Td reads *upapādayiṣyāma(h)* in YVi 2.20 (p. 161/PDF p. 61). Both readings are attested in different manuscripts. Does this mean that our author had access to more than one manuscript of the *Yogabhāṣya*?

1 **1.4.4.1 Criticism of the Naiyāyika position of *pratyakṣa*, including their**
2 **position on *pramāṇaphala***

prakriyāyānyaprakṛtam L, tatprakriyāyām a(yānya)prakṛtam E

3 Naiyāyika definition of *pratyakṣa*; still inside the discussion on *pramāṇaphala*... Better consult NBh 1.1.4 or thereabout

6 sannikarṣa = *pratyakṣa* sannikarṣa <- *kriyā*; sannikarṣa = *kriyāphala* sannikarṣa = *samyoga* *samyoga* = *kriyāja* (*kriyāphala*) i.e., sannikarṣa/*samyoga* comes from *kriyā* or *kriyāphala*, i.e., *pratyakṣa* is *kriyāphala* (the result of an action) A is born from B then B is A's *pramāṇa*; A that is born is the result (*phala*) of B B -> A then B is *pramāṇa* and A is *phala* This is a general principle that both sides should accept but according to the Naiyāyikas *samyoga* = sannikarṣa = *pratyakṣa* = *pramāṇa* is a *phala* of an action not the source (*pramāṇa*); here is a contradiction

7 Then the Naiyāyikas say sannikarṣa = *samyoga* = *pratyakṣa* = *pramāṇa* is a *phala* (*kriyāja*) but toward *jñāna*, it is *pramāṇa* (source), generator

8 [Siddhāntin] The key here is the distinction between *utpādaka* and *jñāpaka*. *Utpādaka* should refer to sannikarṣa's being a *kāraka*

11 *prakriyā* is something like a themed discussion? Cf. *prakaraṇa*? The verb *pra-kṛ* means something like "to talk about something"?

13 The point of this opponent's argument is *jñānotpattikāraṇa* is *jñāpaka*, and hence sannikarṣa is *pramāṇa*; no need to distinguish *utpādaka* and *jñāpaka*; makes sense, no?

14 Where do the Naiyāyikas teach this? The point should be that one cannot identify *jñāpaka* and *jñānasyotpādaka* because only another(?) *jñāna* is the *jñāpaka* of *jñāna*?

- 1 So, jñāna, not being a jñāna, it cannot be known
2 This one sounds alright, again
3 Perhaps both jñānasya and jñāne are necessary in this context. No need to emend, probably
5 "It is not possible to get rid of the anavasthā if jñāna is to be known and as long as one does not accept ātman being essentially the consciousness."
11 This ends the discussion on sannikarṣa
14 Well, the earlier discussion.
18 There might be still textual problems but overall the idea is clear.
23 "...the notions of hāna, etc., are not phala" Again, the text looks more or less alright. There might be a significance with regard to our author's position on abhāva.... rāga -> upādāna(buddhi); dveṣa -> parityāga(buddhi)/hāna(buddhi)

2 Err, "There would be the undesirable consequence that rāga, dveṣa, and upekṣā are the
pramāṇa with regard to the notions of upādāna, etc., being the result"? The idea seems OK
given the diagram above.

3 "But nothing contradicts if [the result/phala is] pauruṣeyacittavṛttibodha."??? iti is again
significant here

7 Cittavṛtti and saṃvedyatvaṃ; a new topic So, here cittavṛtti = pramāṇa =
karaṇa; cittavṛtteḥ saṃvedyatvaṃ is a problem because of the statement "phalam
tad(pramāṇākhyacittavṛtti)aviśiṣṭaḥ pauruṣeṣaḥ cittavṛttibodhaḥ| pratisaṃvedī puruṣa ity
upariṣṭāt pravedayiṣyāmaḥ" We have come back to the interpretation of the Bhāṣya For this
opponent, the above implies that cittavṛtti is a karaṇa and it cannot be a karman

8 kriyānirvṛtti or nirvṛtti? Rather nirvṛtti, no? The edition reads that so it is probably my
typo when I made the e-text

12 This paragraph is totally obscure... Well, this is from the Śābarabhāṣya! Shows up in the
ŚBh, NMañ, Bhāmatī, ŚV commentaries, etc. In essence, the author is saying that pramāṇa
is kriyā and therefore not a kāraka and therefore not a karaṇa?

18 This sentence does not look good, The last sentence should contribute to the point that
kriyā is not a kāraka; and it appears that it is still in the context of anavasthā the reading
antya, in contrast to prathama, might be good. These two paragraphs are really hard to
figure out

2 Does this part have anything to do with Nyāyasūtra Nyāyabhāṣya NS NBh 1.1.22?

2 "tu" is here. As opposed to what? Probably kriyā

3 pradīpa, etc., are abhivyañjaka; they are saṃvedya; by being naturally known, they are karaṇa; so is the cittavṛtti...

6 The sight, etc., do reveal things but they are not grasped, i.e., asaṃvedya, therefore there is a vyabhicāra: not everything that reveals does so by being saṃvedya.

8 The following should explain what he means by samānajātīyasamkarāt; why the sight, etc., are not saṃvedya "due to the confusion with things of the same kind" (?)

9 position A (Naiyāyikas)

11 This paragraph appears to be relatively well-preserved

12 Who?

12 Thus far is an explanation why cakṣur etc., are not saṃvedya even though they are abhivyañjaka

14 The expression prāptacaitanyopagraharūpa is from YBh 2.20, 4.22. This adjective modifies buddhivṛtti The point the S has to prove is that a) cittavṛtti is abhivyañjaka and that b) it is not a grāhya...? It is not grāhya because it is a kriyā...? Shouldn't he be arguing that cittavṛtti is saṃvedya and it is a abhivyañjaka? The opponet here is saying "cittavṛtti is not a vyañjaka and that's why it is not cognized." Our author should counter on both counts, no?

15 Several things to note here. Puruṣa is equated as ātman, it is considered to be sarvagata and sūkṣma. This sentence should be explaining how the grahaṇa (saṃvid) of cittavṛtti occurs and it appears as though it is not happening.

18 This must be the conclusion of the discussion on pramāṇaphala!

1 **1.4.5.1 How is *cittavṛtti* object of awareness (*saṃvedya*)? Not as**

4 Who are these people? What's the point of bringing this up? This discussion in fact is related to the one that starts at XYZ Now I'm pretty sure that the reading should be pratyakṣeṇa saṃvedyā. The difference between the view being attacked and our author's is whether cittavṛtti is saṃvedya by being abhivyañjaka or by being pratyakṣa! Since it is hard to make sense out of this discussion, should we emend the text to "pratyakṣeṇa saṃvedyā"? That would be the Buddhist and Naiyāyika position. The last compound should mean the abhāva of both phalagrahaṇa and pramāṇa Should the last part be pramāṇavyāpārābhāvaḥ? So the whole compound is phalagrahaṇapramāṇavyāpārābhāvaḥ?

4 Is he talking about paracittavṛtti? Most unlikely. Arthāpatti suddenly appearing here is also suspicious. Maybe the argument is if phala is grasped, the existence of pramāṇa/jñāna is inevitable. But...

5 So, "ca" here means "but," stating what happens if we accept the opponent's position. The phala is not grasped and therefore the knowledge or pramāṇa does not exist. Because the opponent cannot accept the operation of pramāṇa because doing so would result in anavasthā situation.

7 tad here is pramāṇavyāpāra tasyāpīti tatpramāṇasyāpi so, pramāṇa P1 -> phala Ph1 -> vyāpāra V1 is the basic. If phala is cittavṛtti grasped by pratyakṣa then pramāṇa P1 -> (cittavṛttibodha Ph1 = Ph2 <- pratyakṣa P2) -> vyāpāra V1 then pramāṇa P1 -> ((cittavṛttibodha Ph1 = Ph2 <- pratyakṣa P2) = Ph3 <- pratyakṣa P3) -> vyāpāra V1 then
7 Is Sureśvara dealing with the same type of person? /6_sas-
tra/3_phil/vedanta/naiskarmyasiddhi_incomplete.txt:na ca sukhaduḥkhādisaṃbandho
.avagatyātmanaḥ pratyakṣādipramāṇair grhyate yena virodhaḥ pratyakṣādipramāṇair
udchātyate | katham | śṛṇu | Even Dharmakīrti explicitly(?) says: rāga-dveṣa-
sukhaduḥkhādīnāṃ sarvacittacaittānāṃ ātmasaṃvedanaṃ pratyakṣam avikalpatvāt | Cf.
this from the Brahmasiddhi: tathā hi—pramāṇasya phalaṃ arthāntaram anarthāntaram
vā sarvaparīkṣakair pratijñāyate prajñāyate ca | na ca tad asaṃvedyam, tadasaṃvedyatve
sarvasaṃvedyatvaprasaṅgāt, tatkr̥tatvāt saṃvedyabhāvasya bhāvānām | na ca saṃvedyam,
phalāntarānupalabdher anavasthāprasāṅgāc ca | tasmāt saṃvedyam, ātmaprakāśatvāt;
asaṃvedyam ca, viśayavat karmabhāvābhāvāt | Maṇḍana's position is that pramāṇaphala is
both saṃvedya and asaṃvedya.

8 The original reading in the common ancestor was "pramāṇavyāpārāḥ tasyāttadā." L actually reads: L10v7 starts vyāpārāḥ ta syāttadāpramāṇābhāvāt phalasyāsattvaṃ prasaktam It is probably reasonable to assume something is missing between the ta and syāt. Since vyāpārāḥ ends with a visarga, there was an awareness that it ended an utterance. Then what would follow is tasya...āt. Then the phrase may be followed by another sentence There is probably a significant portion missing!

11 tad here must be phala, teṣāṃ pramāṇānām. The basic flow of events appears to be pramāṇa -> (pramāṇa)phala -> (pramāṇa)vyāpāra. The removal of teṣāṃ from the text might be preferable but then where did it come from?

1 This does sound strange. "phalaṇ api"? tad should be phala. "Even when not being grasped, the same [phala] is the knowledge; the phala, too, has a pramāṇa" or rather the second part should be "the pramāṇa is the evidence (pramāṇa) also for the [existence of] the phala [i.e., there is no need for the phala/jñāna to be grasped. We know that it exists because vyāpāra is being produced]" This could be an answer to the anavasthā problem in the sense there is no need for the phala to be grasped Looks like pramāṇa -> phala = jñāna -> vyāpāra

- 2 Be reminded that abhivyañjakadharmā belongs to cittavṛtti according to our author
2 If bhi and ti looked similar, this is another indication that the text was from a northern script origin.
3 Revealer is always grasped. See above! Reminds me of the lamp being a bad example of. But isn't this complete opposite of what our author argued for? cittavṛtti is samvedya/grhya for being abhivyañjaka? This is true if we follow the reading of Lpc (and M, A, and E)
4 Perhaps the most plausible understanding of this example is that fire does what it does with or without anyone watching.
5 "But the same [pramāṇa] revealing [the object] is the pramāṇa also toward the phala." "abhivyañjayat" should modify "pramāṇam" that should be the pramāṇa for phala, too -> the pramāṇa for the phala was the problem
6 Are rāga, etc., here refer to the phala? The word grahaṇa/graha is being used for the phala in this context. Be reminded that rāga and dveṣa give rise to upādāna and hāna/tyāga. Need to read this a bit more carefully but looks OK in essence.
8 This is weird. Where did the edition get the reading?
9 Here again, iti is used very effectively.
